Program Learning Outcomes

Program Name: Geology B.A.

	Program Learning Outcomes Courses Mapped to Outcomes															
ŀ	Knowledge, skill, or behavior students cap demonstrate upon program completion 100															
1	Observe, record, and interpret geological features in the field.	I		I	R	R		R	R			М	R			R
				I	I/R	Μ	Μ	Μ	Μ	Μ	Μ		Μ	Μ	Μ	Μ
3	Read, understand, and write geolog literature.	I	I	I	I	R	М			М		R	М	М		М
4	Describe, classify, and interpret common geological materials and structures.	I	I	I	R	М	М	R	М		R	R/M	М			М
5	Understanding plate tectonics as the unifying theory in geology.	I	I/R		М		R									
6	Appreciate howdeep time" informs an understanding of the origins of geological features and resources, a use geological features to reconstru- natural history.	ind		I	R/M		R			R			М			
7	Understand the scientific process, p scientific hypotheses, devise ways to them by collecting scientific data, an analyze data in a meaningful way.	o test	I	I	R	М					R		М		R	

I= Introduced R= Reinforced M= Mastered

Date:121820 rev. -77-22

Program Learning Outcomes: Assessment Tools

Program Name: Geology B.A.

Date:121820 rev.-77-22

Kno	ogram Learning Outcome wledge, skill, or behavior students monstrate upon program completi	Measurement Tool	Timeline/Frequency of Assessment	Target	Review
1	Observe, record, and interpret geological features in the field.	GES 341 fieldbooks, journals, or reports	Every 3 years, beginn200222023	80% of reports acceptable as professional field notes	Departmenteview of results
2	Understand the theoretical underpinnings and methods of d analysis, including quantitative analysis, that uniquely undergird specific subdisciplines withen geosciences	Evaluative assessments in atadividual Mastery courses. Ex- questions or assignments deem as testing mastery are collected review.	ed	80% of artifacts demonstrate mastery of target skill for the assignment	Departmenteview of results
3	Read, understand, and write geological literature.	"Appropriate use of literature" included as a component of the grade for at least one assignme in each Mastery course. This component is recorded separate andreviewed across a subset of mastery courses during Department Assessment Retreat	nt ely	80% of artifacts demonstrate mastery of target skill for the assignment	Departmenteview of results
4	Describe, classify, and interpret common geological materials an structures.	Evaluative assessments in dindividual Mastery labs. GES 2 GES 252, and GES 453 retain a sample assignment for review.		80% of artifacts demonstrate mastery of target skilltfor assignment	Departmenteview of results
5 6	Understanding plate tectonics as the unifying theory in geology.	Summary exam question in GE 203, retained and reviewed.	Every 3 years, beginning 200223	80% of questions reviewed demonstrate understanding	Departmenteview of results

	features to reconstruct natural history.			
7	Understand the scientific proces posit scientific hypotheses, devis ways to test them by collecting scientific data, and analyze data meaningful way.	Every 3 years, beginning 2202223	80% of assignments evaluated demonstrate understanding	Departmenteview of results
